KNÜRR ERGOCON®

THE ULTIMATE 24/7 CONSOLE FOR CRITICAL OPERATIONS

The new **Knürr Ergocon®** console sets the standard for the most demanding 24-hour deployments in various types of control rooms and control suites:

- Best possible ergonomics, using multidimensional setting options on three axes (table height, monitor height, and viewing distance).

- Solutions for individual areas of application and perfect device integration from a wide variety of console models.

- In combination with Knürr® Ergocontrol, each user can have customized settings. This free seating concept guarantees efficient workstation ergonomics.

With many years of experience in equipping mission-critical control centers, our Knürr workstation experts design perfectly adapted workstations for emergency service organizations such as fire departments, rescue services, disaster and civil protection, police, as well as for private security centers.

Knürr Ergocon®

with new KVM-ready technology cabinet

Intelligent cable routing
Cables are routed in a roomy and hidden vertical support on the side of the table, accessible from both inside and out.

High-quality desk tops
- Available in rectangular and curved designs
- Single-level or bi-level work surface.
- Framed by ergonomic and heavy-duty Knürr ErgoSoft edging.

Modular console system
Choice between four different base frame widths
- 1400 mm
- 1800 mm
- 2200 mm
- 2x1400 mm for extra-large consoles

Standard compliance
- DIN EN ISO 11064: Ergonomic design of control centers
- DIN EN 527 defines workstation types with minimum requirements for range of settings:
  Type A: min. 650 to 1,250 mm
  Type D: min. 680 to 1,180 mm
  We fulfill both requirements!*

Stability and design
Stable c-base frame for maximum legroom.
Optional colored decorative strips made of extruded aluminum for a personal touch.

* Depending on the corresponding console design

Modern colors
Base frame in RAL 9006 White aluminium. Tabletop, decorative strips, and wood trim on technology cabinet available in six different designs.

Secure monitor connection
Highest flexibility using single-level and two-level monitor rails, with the option of motorized height and depth adjustment.

KVM-ready technology cabinet
With up to 3x6 RU 19" installation space for the perfect integration of KVM switches, SFF-PC, power distribution, cable management accessories, and much more.

Integrated passive ventilation concept
Guarantees maximum reliability of IT components.

Comfortable height adjustment
Simple height adjustment for working and monitor levels, with memory function (standard).

Knürr Ergocon®

The right console for your specific application!

To keep up with the growing requirements for control center consoles, we have developed the new Knürr Ergocon® console in three different designs:

The common element is the new multifunctional side compartment.

## Clever side compartment with multiple features:

Collision protection
using integrated piezoelectric sensors.

Secure cable routing
for optimal bending.

Various installation options
Integration of data and power transfer points using the corresponding Knürr accessories.

Complete grounding concept

Maximum accessibility
for maintenance purposes, with removable side covers (optionally lockable).

Concealed cables
through raised floor and spacious openings.

1 Installation module

Area of application:
Technical integration with
max. 3x1 RU 19" installation space
under the tabletop, typical for video
extender applications.

2 KVM-ready technology cabinet

Area of application:
Up to 3x6 RU for integrating
technology, typical for KVM
applications, SFF or micro-
workstations.

3 Workstation technology cabinet in base

Area of application:
Maximum technical integration for
tower or 19" workstation requiring
much space, typical for powerful
servers and rack-mounted equipment
directly on the console.

Rectangular consoles:

Application:

**Especially suited for efficient setups in rows in front of large-format screens on a wall.**

A single console can also be efficiently placed into the existing infrastructure, saving space due its rectangular shape. Rectangular workstations are especially recommended for changing activities between manual writing work and computer-supported work. Our rectangular consoles are available not only in a single-level design, but also as a bi-level table, with the rear level able to drop down 70 mm.

To meet your specific requirements, you have a choice between **four different widths**:

- **1600 mm**
  (base width 1400 mm)
- **2000 mm**
  (base width 1800 mm)
- **2400mm**
 (base width 2200mm)
- **3000 mm**
 (base width 2x1400 mm)

Single-level work surface
Bi-level work surface

Dimensions:

Single-level work surface:

Bi-level work surface:

Curved consoles:

Convex arrangement, large radius

Convex arrangement, small radius

Concave arrangement

Application:

Especially suited for circular arrangement of consoles in control rooms.

The innovative curved tabletops offer clear advantages: They can be arranged in various curve shapes, whether tight or open, concave or convex.
For single consoles, the ergonomically rounded tabletops play a significant role in reducing the risk of hitting table corners in heavily trafficked control rooms.

Our curved consoles are also available in a single-level design, as well as a bi-level table, with the rear level capable of lowering 70mm. To meet your specific requirements, you have a choice between **four different widths**:

- **1800 mm** (base width 1400 mm)
- **2200mm** (base width 1800mm)
  2600mm (base width 2200mm)
- **3100 mm** (base width 2x1400 mm)

Dimensions:

Single-level work surface:

| 1800	2200	2600	3100
1200 / 1400	1800	2200	2850

Bi-level work surface:

1600	2000	2400	3100
500 / 700 / 1400	1800	2200	2850
Monitor levels:

The monitor level is the main element found above the working surface.
To offer the user optimal ergonomics,

Knürr has three different designs for monitor placement:

1. **Heightfix (H-Fix)**

2. **Height-adjustable (H-A)**

3. **Height/depth-adjustable (H/D-A)**

Hfix single-level

H-A single-level

H/D-A single-level

Hfix two-level

H-A two-level

H/D-A two-level

1. Heightfix (H-Fix):

The horizontal function rail with integrated cable duct guarantees secure and stable monitor mounting. This allows the tabletop below the monitor to remain free for other devices or desk attachments. Large-volume energy chains provide for protected and orderly cable routing.

The patented multi-function unit establishes the basic framework for any monitor mount. It incorporates functions such as concealed

cable routing and mounting for the vertical columns (as well as the optional Knürr-DICON personal docking units).

2. Height-adjustable (H-A):

Above and beyond the functions of the H-Fix monitor level, the H-A version offers infinitely variable electrical height adjustment for monitors. Secure operation is always certain with the integrated piezoelectric sensors for collision protection.

3. Height- and depth-adjustable (H/D-A):

In addition to the functions of the H-Fix and H-A monitor levels, this version is equipped with completely concealed, electrical depth adjustment. This allows the user to adjust all levels as they see fit for the best possible ergonomics and the optimal viewing distance to the monitors.

Knürr® multi-function unit:

Concealed cable duct
from the technical area to the monitor level.

Large-volume energy chain
for protected cable routing and optimal bending radius.

Lifting column
with mounts for monitor rails.

Knürr® multi-function unit

Knürr®-DICON module
for customizing with power and data modules.
Colors:

- Tabletop in **RAL7035, Light grey**

Knürr Ergocon®
Configurator

The possibilities are impressive!

Over 2,000 variations are available, using the configurable part numbers.

This lets you put together the perfect console, designed specifically to meet your tastes and requirements.

You can include an installation module, KVM-ready technology cabinet in the base, workstation technology cabinet in base, rectangular or curved tabletop, single-level or bi-level design, and up to two-level monitor rails with depth adjustment.

You will always find the right Knürr console for your particular application!

Using the **Knürr Ergocon®**
configuration table, you can specify the
console that is best for you.

Part no.:	04.500.

Knürr®-Dicon for multi-function unit

- Suitable for integration in the Ergocon multi-function unit
- Customizable power and data supply unit
- Available in three country versions (DE-Germany, F-France, CH-Switzerland) with two or three power outlets (for CH: one or two)
- Flexible equipping of data module elements using keystone mounts

- **Material/surface**
  - Housing: closed sheet steel profile, galvanized, powder-coated structure
  - Plastic parts: Vampamid 6 0024 VO (UL94), recyclable
  - Center core: continuous power rails, brass

- **Approvals/certificates**
  - CE label in accordance with:

- Low-voltage guideline 2014/35/EU
- EMC guideline 2014/30/EU
- RoHS guideline 2011/65/EU
- Bureau Veritas BG certificate (factory inspection)
- Bureau Veritas CB certificate

- **Colors**
  - Housing: RAL 9005 Jet black microstructure
  - Plastic parts: black

- **Load capacity**
  - 100–240 V AC/16 A (Schuko and France)
  - 100–240 V AC/10 A (Switzerland)

- **Supply schedule**

Link-up container and link-up duct

Knürr Ergocon® Link-up container

- Basic body of link-up container with storage compartment H150mm and garage for Ergocon mobile drawer unit
- Generous technical module with 19" frame in the rear area
- Removable perforated rear panel (optionally lockable or with push lock)
- Link-up duct on both sides for lateral connection to the Knürr Ergocon® console for optimised cabling
- Removable top cover on link-up ducts for best accessibility
- Free-form table top with high-quality HPL coating and all-round ABS edge banding

- **Material**
  - Link-up container:
    Basic body: Wooden corpus, coated
    Tabletop: HPL coated with ABS edging
  - Removable rear panel
  - Sheet steel, powder coated

- **Surface**
  - Basic body, rear panel and link-up ducts completely in RAL9006, White Aluminum
  - Tabletop .A in RAL7035, Light Grey, ABS edging in black (Different tabletop colors are available to match the console design)

- **Supply schedule**
  - 1 Link-up container
  - 1 Tabletop
  - 2 Link-up ducts

- **How supplied**
  - Pre-mounted.

- **Note**
